SERVICE GUIDE

GUARDING SERVICES

Professional, disciplined officers securing your premises, people, and critical assets.

[Overview]

Bemil's Guarding division deploys over 5,000 professionally trained security operatives across corporate campuses, industrial facilities, estates, banks, and sensitive government installations. Every officer is vetted, uniformed, and held to the Bemil Standard – ensuring consistent, reliable protection that you can depend on day and night.

[Guard Deployment Options]

We tailor every deployment to the specific risk profile of your site.

Options include:

- **Static Guards:** Fixed-post officers at gates, entrances, control rooms, and sensitive areas.
- **Mobile Patrol Teams:** Regular perimeter and interior patrols on scheduled or random rotation.
- **Event Security:** Temporary deployments for conferences, product launches, and corporate gatherings.

[Industries & Environments We Secure]

- Banking halls, ATM vestibules, and financial head offices
- Oil & gas facilities, flow stations, and pipeline corridors
- Industrial plants, warehouses, and manufacturing complexes
- Gated residential estates and high-net-worth residences
- Telecommunications infrastructure and data centres

- Hospitals, schools, and non-governmental organisation campuses
- Government ministries, departments, and agencies
- Retail supermarkets, shopping malls, and logistics hubs

[Our Vetting & Training Process]

A guard is only as good as the system behind them. The Bemil Standard ensures every officer is ready before they ever reach your gate:

- **Background Checks:** 10-year employment history verification and criminal record screening through authorised channels.
- **Psychological Screening:** Structured assessment to confirm temperament, judgement, and stress tolerance.
- **Physical Fitness Test:** Standardised fitness evaluation aligned to operational deployment requirements.
- **Supervised Deployment:** New guards are placed under direct supervision by a senior officer during their initial posting period.

[Supervision & Accountability]

Your security deployment is backed by multiple layers of management oversight:

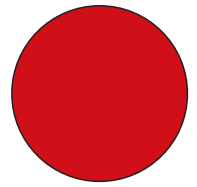

- Resident Site Supervisor for every major deployment
- Area Manager conducting unannounced spot inspections
- Dedicated Client Relationship Officer as your single point of contact
- 24/7 operations control room for incident escalation and rapid response
- Monthly performance reports shared with the client
- Digital incident logging and post-event analysis

[Technology Integration]

Our guarding service can be integrated with electronic security systems to create a layered defence:

- CCTV monitoring with guard-linked response protocols
- Electronic access control and biometric verification
- GPS-tracked mobile patrol vehicles
- Digital visitor management and logbook systems
- Panic button and duress alarm integration

Trust is our core product. We don't just fill posts – we build security cultures that protect what matters most.
