SERVICE GUIDE

JOURNEY MANAGEMENT

Planned, monitored, and incident-ready
transportation support across Nigeria.

[Overview]

Moving people and cargo across Nigeria presents real risks — from road crime and kidnapping to traffic choke points and infrastructure failures. Bemil's Journey Management service ensures that every movement is planned, monitored, and supported by a rapid-response capability. We protect your staff, executives, and cargo from departure to destination.

[The Journey Management Cycle]

We approach every movement as a mission, applying the same rigorous planning framework used by professional security and logistics operations:

- **Pre-Journey Planning:** Route analysis incorporating real-time intelligence on criminal activity, road conditions, and political events. Travel window optimisation to avoid high-risk periods.
- **Threat Assessment:** Identified choke points, known ambush corridors, and alternative routes are documented before any movement begins.
- **Escort Deployment:** Armed or unarmed escort teams dispatched in advance-cleared vehicles ahead of and alongside the principal convoy.
- **Live Monitoring:** Real-time GPS tracking and regular communication checks with our 24/7 control room at defined waypoints.
- **Incident Response:** Pre-positioned rapid response teams and documented escalation protocols activated within minutes of any deviation or incident.
- **Post-Journey Debrief:** Written debrief report covering route conditions, incidents, and recommendations for future movements.

[What We Move & Who We Protect]

Our Journey Management service covers a wide range of principals and cargo types:

PEOPLE

Corporate executives and C-suite staff

Expatriate employees and visiting delegations

Diplomats and VIP dignitaries

Field staff in high-risk corridors

Project teams in oil and gas locations

CARGO

Sensitive technical equipment

High-value industrial components

Pharmaceutical products and medical supplies

Payroll and financial instruments

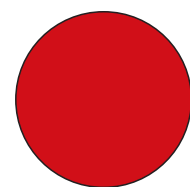

Legal and confidential documents

[Escort & Vehicle Capabilities]

- **Low-Profile Vehicles:** Unmarked civilian vehicles for discreet executive movement where overt security presence is counterproductive.
- **High-Visibility Escort:** Marked security vehicles with uniformed operatives for deterrent-effect convoys and cash movements.
- **Armored Options:** B6/B7-rated armored vehicles for the highest-risk environments and routes.
- **Trained Drivers:** Defensive and evasive driving-qualified operators for secure transportation.
- **Convoy Configuration:** Lead vehicle, principal vehicle, and chase vehicle formations for multi-asset movements.

[Industries We Serve]

- Oil & gas operators, contractors, and service companies in the Niger Delta
- Multinational corporations with field operations across Nigeria
- NGOs and UN agencies operating in humanitarian corridors
- Construction and infrastructure project developers
- Financial services firms managing inter-state cash flows
- Embassies, high commissions, and international organisations
- Telecommunications companies managing tower infrastructure

**We don't just escort – we plan, monitor,
and respond. Every journey is a mission,
and every mission is completed safely.**
